

RAO MUHAMMAD SHAYAN

FULL STACK WEB DEVELOPER

Shah Faisal Green Town, Karachi | raomuhammadshayan897@gmail.com | +92 318 119624 | <https://github.com/rm-Shayan>

SUMMARY

Impact-driven Full-Stack Developer with a focus on delivering exceptional performance, eager to tackle dynamic challenges and apply expertise in the MERN ecosystem and TypeScript. Demonstrated proficiency in designing RESTful APIs, implementing secure OAuth2/JWT authentication flows, and optimizing NoSQL schemas for scalability. Skilled in modernizing frontend workflows using Tailwind CSS and Server-Side Rendering (SSR). Strong DevOps foundation with experience in Docker, GitHub Actions (CI/CD), and deploying microservices to AWS (EC2/S3). Proficient in project management, user-centric problem-solving, and seamless collaboration across teams, leveraging state-of-the-art tools and methodologies to streamline processes and elevate user satisfaction.

TECHNICAL SKILLS

JavaScript/TypeScript	Git/GitHub	Expressjs/Docker/linux
Node.js/React.js	MongoDB/Postgres	CI/CD
Nextjs/Tailwind/MUI	JWT/OATH2	AWS

PROFESSIONAL EXPERIENCE

- ### Fintech Fraud Reporting System (State Bank of Pakistan)

OCT-2024=>FEB-2026

 - **Full-Stack MERN Developer**
 - Created a multi-tenant platform with Role-Based Access Control (RBAC) for Users, Commercial Banks, and SBP Super Admins.
 - Ensured secure backend management of fraud reporting data in compliance with financial regulations.
 - Implemented automated reporting workflows for real-time monitoring of digital banking fraud trends.
 - Developed a custom React dashboard for data visualization, aiding regulators in identifying high-risk transaction patterns.
- ### Investocrafy | AI-Powered Investment Guide
 - **Lead Developer / Founder**
 - Built Investocrafy, an AI platform for product analysis and investment strategies.
 - Integrated Natural Language Processing (NLP) to simplify complex financial data for actionable insights.
 - Created an automated analysis engine for evaluating market products and summarizing risk vs. reward.
 - Designed the frontend with React for a user-friendly experience, allowing portfolio tracking and analysis.
- ### Real-Time Enterprise Chat Application
 - **Full-Stack Developer**
 - Developed a messaging engine for private and group chats.
 - Used Socket.io for real-time communication with high reliability.
 - Added "Message Status" and "Typing" indicators for user engagement.
 - Optimized MongoDB schemas for scalability to manage large message histories and media.

EDUCATION

Intermediate And Matric2009-May-2022
